How to get good results

- Fill in every [BRACKET] with real details from the actual job — names, dates, prices, and addresses make the result sound like you wrote it yourself.
- Read the result once before sending and fix anything that sounds off, especially prices, dates, and the spelling of the customer's name.
- If the first result is too long or too stiff, paste this after it: "Make it shorter and more friendly, like a text from a local business owner."
- Keep one prompt for each job type you do often, and just change the bracket details each time instead of starting over.
- Never send prices, payment offers, or promises you are not ready to stand behind — read those lines twice before you hit send.
